

MOSAIC Guidance

Documents and Case Notes

Important Notice: Records should only be accessed where there is a lawful and business need to do so. All activity on Mosaic can be audited and is subject to compliance spot checks. Any irregular activity could result in disciplinary action up to and including dismissal. Unlawful activity on Mosaic may also result in prosecution under the provisions of the Data Protection Act 2018.

For further assistance in using Mosaic – please contact the System Support Officers.

Documents

When a document is uploaded to Mosaic a case note should always be added to record this.

The date of the case note should be the date of the document or the date it was received (not the date it was uploaded)

The content of the case note should be (name of document) was uploaded into documents on (date)

Record information on case notes, no need to scan or keep original paper

- Standard letters of invitation or appointment – copy and paste the letter if produced internally and add list of names and addresses of all invitees
- Information received in paper format that can be recorded in case notes

Scan or Attach document but do not keep original

- Referral letters.
- Letters from service users.
- Documents with information which cannot easily or unambiguously be paraphrased in case notes.
- External reports.
- Service agreements.
- Documents requiring signatures.
- Witness statements.
- Medical reports.
- Written consent forms.
- Invitation to Child Protection Conference and other meetings chaired by a Child Protection Co-ordinator (see below).

For each Child Protection Conference and other meetings usually chaired by a child protection co-ordinator, one copy of the letter of invitation to all professionals should be attached, including a list of all people who have been sent this letter.

Individualised letters to parents, children or other family members should also be attached.

Scan and keep originals

- Birth certificates.
- Legal orders.
- Documents where legal advice confirms it is necessary to have an original signature (rather than a scanned one).

There is no need to scan and upload any Mosaic forms e.g. Social Workers Report to ICPC/RCPC

If documents are available electronically, upload directly rather than scan and upload

Case Notes

Do not use hyperlinks in case notes

This can cause Mosaic to freeze

Uploading emails into case notes

Ensure that you edit emails

If the e mail mentions more than 1 service user,

Do not paste in any personal messages (e.g. if the sender add a note such as have a good weekend).

Ensure that you do not paste in any web addresses in the emails as this will cause difficulty in opening case notes

Uploading letters into case notes

Letters cannot be uploaded into case notes, they can be copied and pasted if held electronically

To add a case note

- Click on case notes on the left hand side of the persons record
- Click add
- Complete the case note but remember
- Make sure that the heading is clear and obvious as to what it contains, don't just replicate what will be in the type of case note
- Check the date and time is correct – default is today and now
- Tick the box if it is a significant event – this will put it in bold but it will not add to a chronology
- If adding alert recipients – is good practice to add at the bottom of the case note who the alerts were sent to as there is no way of knowing this after the event.

What it means

- **Save and Continue** – you are continuing to work on the case note. By saving it you should not lose data if you lose your Mosaic session
- **Save and Close** – you don't have time to complete the case note now but it isn't complete. It will save it to the list of all the other case notes but it will have a pencil symbol at the side. You have 24 hours to complete the case note.
- **Finish** – everything is done, you have nothing more to add. However if after finishing the case note you want to add more you can still append more information by clicking on the append symbol. Remember that a case note alert will not be sent until the finish button is pressed.

Copying case note to related others

- After finishing the case note, it will appear in the list of case notes.
- Click on the copy case note button and select who else it needs to go to – take care in who you select, click copy.
- It will show as being a “copy” on the record it was copied to.

Case notes added to the wrong person or amendments needed

- Go to the Mosaic support area, select Mosaic requests and complete the appropriate CFCS form.
- If you hover over the link to a case note – it will give the id number.

Searching Case Notes

- You can re order the case notes by clicking on each of the headings. By date is the default.
- If you list by title alphabetically, it will put case notes starting with a number first, followed by words starting with an upper case letter, then words with a lower case letter.
- Use the “Find Case Note” button to search for a particular case note.
