

Discharge Plan Step Guidance

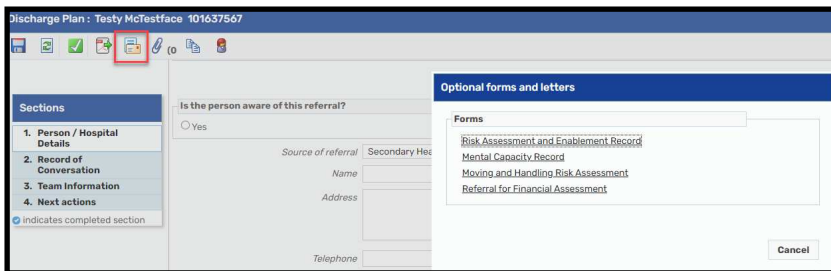

The Discharge Plan step will be sent automatically to your Team Inbox through Interoperability.

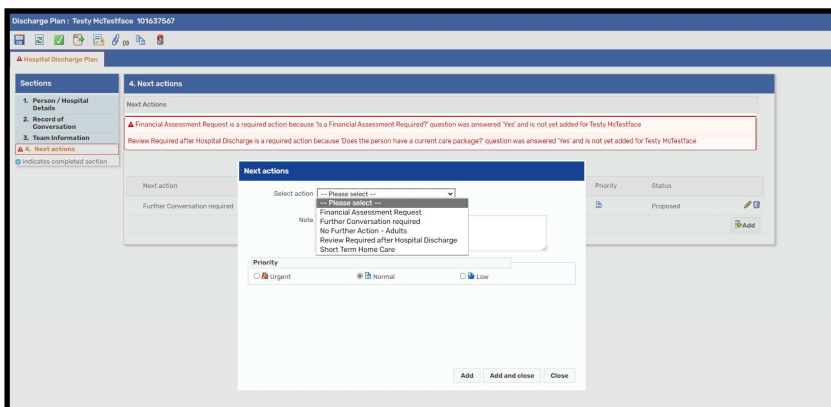

Start the Discharge Plan step and complete the form as fully as possible.

If short term services are required, information entered in section 3 will be copied through to the Short Term Services step.

Please note, the mandatory field 'Does the person have a current care package?' has guidance as to how to use the 'Other' button. This can be used to NFA the step if the person does not have a current care package and does not need any support or care setting up.

There are a number of additional forms that can be accessed by clicking the Forms and Letters  icon.

Depending on the answers given on the Hospital Discharge Plan form there may be mandatory next actions that you have to add to allow you to finish the step.
