

3-Tier Model

Guide to the 3-tier approach

This quick reference guide is designed to introduce you to the 3-tier way of working, the new core workflow and the Mosaic forms

Authors: Linzi Adams, Project Manager and Asche Jacobs, Transformation Partner,
ASCH Transformation Team V1.0 – September 2018.

What is the 3 Tier Model?

3 Tier conversations are all about resolving enquiries at the earliest possible stage by connecting people to existing community resources or short-term support that avoids or delays the need for long-term packages of care. It is a way of better structuring conversations with people who approach the Council for care and support.

The 3 Tier Model aligns with the Council's Adult Social Care Strategy and is based around having three levels of engagement.

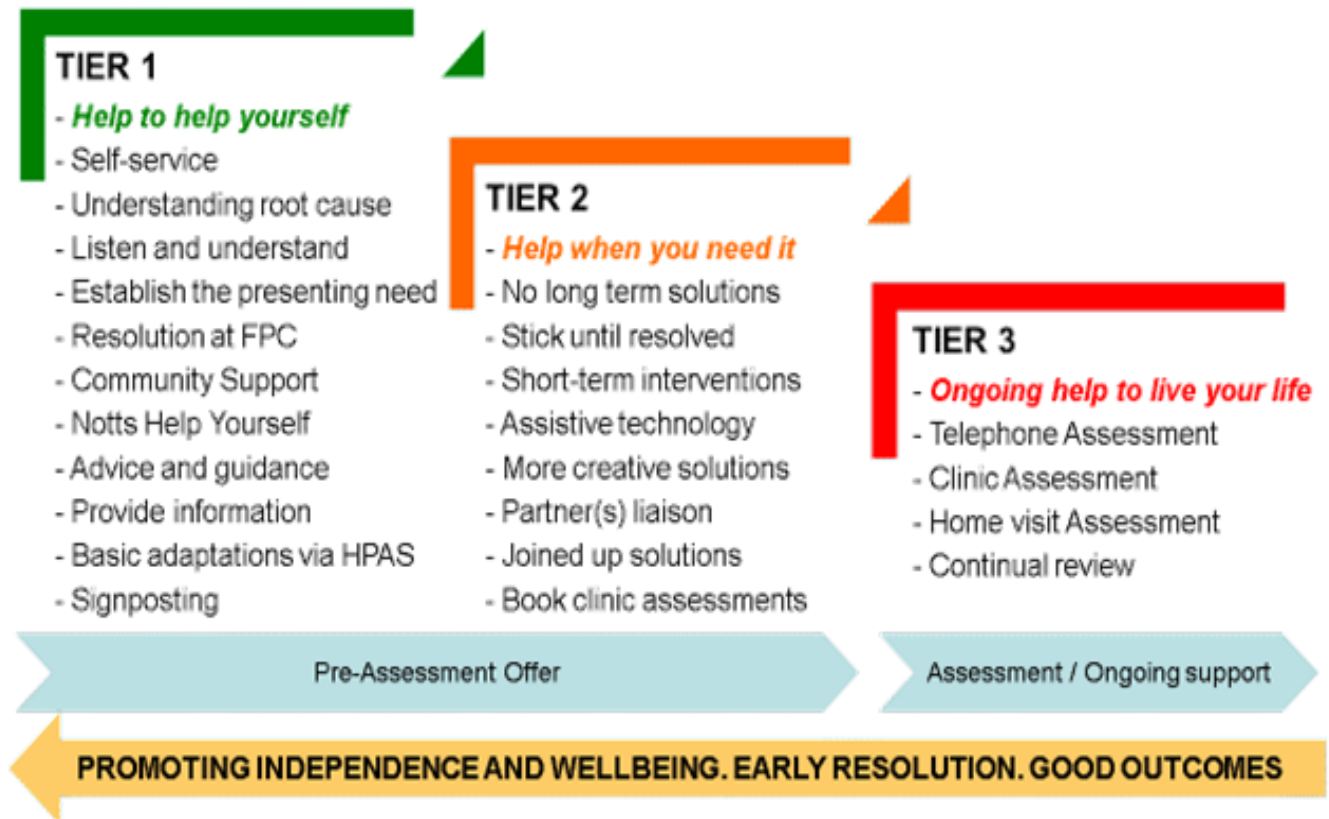

The Tier 1 Conversation is about helping to keep as many people living independently in the county as possible. We will focus on how we can connect people to local and community resources that are already available to them in their neighbourhood and existing support networks that will help them to get on with their life and do the things they want to do. The outcomes of this conversation might be preventative work or the provision of information and advice.

The Tier 2 Conversation is about helping those people whose problems have not been wholly addressed at Tier 1. The Tier 2 conversation will focus on offering swift and appropriate support to help people regain their independence or develop new skills. At this point staff will be empowered to undertake **short-term support** effectively and to solve problems as quickly as possible. A Tier 2 conversation will last for up to 6 weeks and during this period we will work intensively with the person to support them through what might be an emergency or short-term crisis before making any long-term decisions about the care and support they may need.

The Tier 3 Conversation is about helping those people who, after Tier 2, have ongoing care and support needs. Using the person's allocated funding, as well as any other resources available to them, the Tier 3 conversation will focus on working with the person to identify appropriate and individually tailored care that will make a positive difference to their lives. **For district workers this should mean that when a piece of work is received, the worker will first reflect on whether there are any other tier 1 or 2 resolutions that could meet the person's needs without the need for full assessment.**

What is the 3 Tier Model?

The model is a way of structuring our conversations with people who are seeking support from social care into 3 tiers:

Why is the 3 Tier Model being implemented?

The 3 tier model supports the council to manage the ever increasing demand for services that is presenting to us and continues to grow.

Our data shows that following an assessment of social care needs, 69% of people go on to receive a long-term care package with an ongoing financial commitment against the community care budget. If, at the initial contact, we can reduce the number of people who go on to require an assessment by resolving their needs earlier and in a more responsive way, we will help people at an early stage to live an independent life.

The model enables the Customer Service Centre to resolve more enquiries at the initial point of contact, supporting the Council's social care offer to be more responsive and resolve needs at an earlier stage. It enables staff to have conversations that are structured around identifying community and short-term solutions that will reduce the need for people to access long-term services.

What will be the impact of the 3 Tier Model?

In practice, the impact of 3 Tier will be that more service users will have their problems resolved by the Customer Service and Adult Access Team, with only those service users with complex needs being passed through to the District Teams. This change will result in less people being formally assessed and more short-term support will be provided to more people to help meet their needs.

This model changes the way social care operates and staff will focus on offering timely and appropriate support to help people regain their independence or develop new skills, with the aim of reducing the number of service users requiring formal long term services.

The new core workflow in Mosaic

- The existing core workflow within Mosaic includes the Contact and Contact Plus steps. These are being replaced with the 3T Initial Contact, 3T Contact and 3T Contact Plus steps.
- The new forms look quite different to the original Contact and Contact Plus. The forms are considerably shorter and have been designed to enable workers to have a free-flowing conversation with people, with most of the assessment-type questions removed.
- Aside from the changes to the forms, we are expecting fewer pieces of work to be passed to district teams as higher numbers of enquiries are resolved by the Customer Service Centre and the Adult Access Team.
- District teams can now expect to receive the 3T Contact Plus form from the Adult Access Service, rather than a Care and Support Assessment. This is designed to encourage receiving teams to consider any further tier 1 or 2 services which may be appropriate at that time to resolve the person's needs, without having to complete a Care and Support Assessment.

The new core workflow in Mosaic

3T Initial Contact:

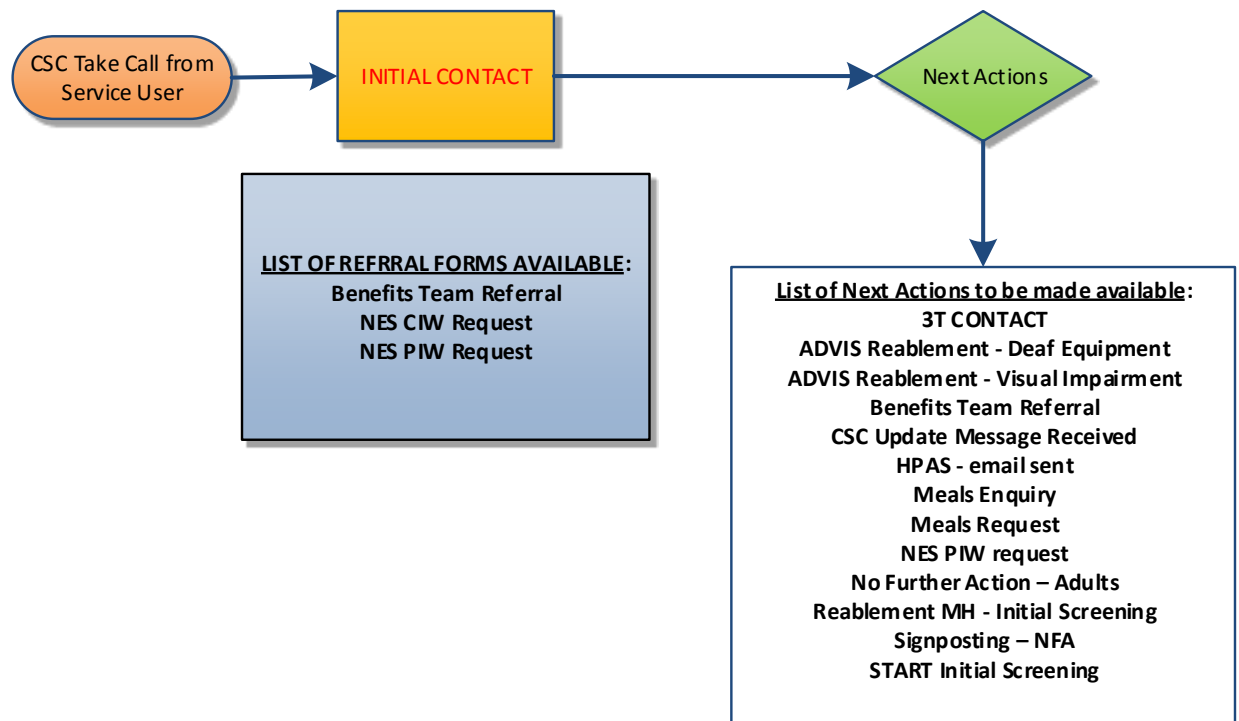

The Initial Contact step is only available to workers within the Customer Service Centre (CSC).

The CSC will attempt to resolve the person's query at the first point of contact. If the presenting need cannot be met through advice, information and signposting, an Initial Contact will be completed and passed on to the relevant team.

If there is current involvement with a social care worker the CSC will still attempt to resolve the query where appropriate. If this is not possible, an Update Message will be sent to the relevant team, as per current process.

If the CSC are able to resolve the person's query through tier 1 (advice, information and signposting), a case note will be added to the person's Mosaic record where that person is known to the Local Authority.

The following graphic illustrates which forms CSC are able to access and complete whilst in the step and which next actions are available to them.

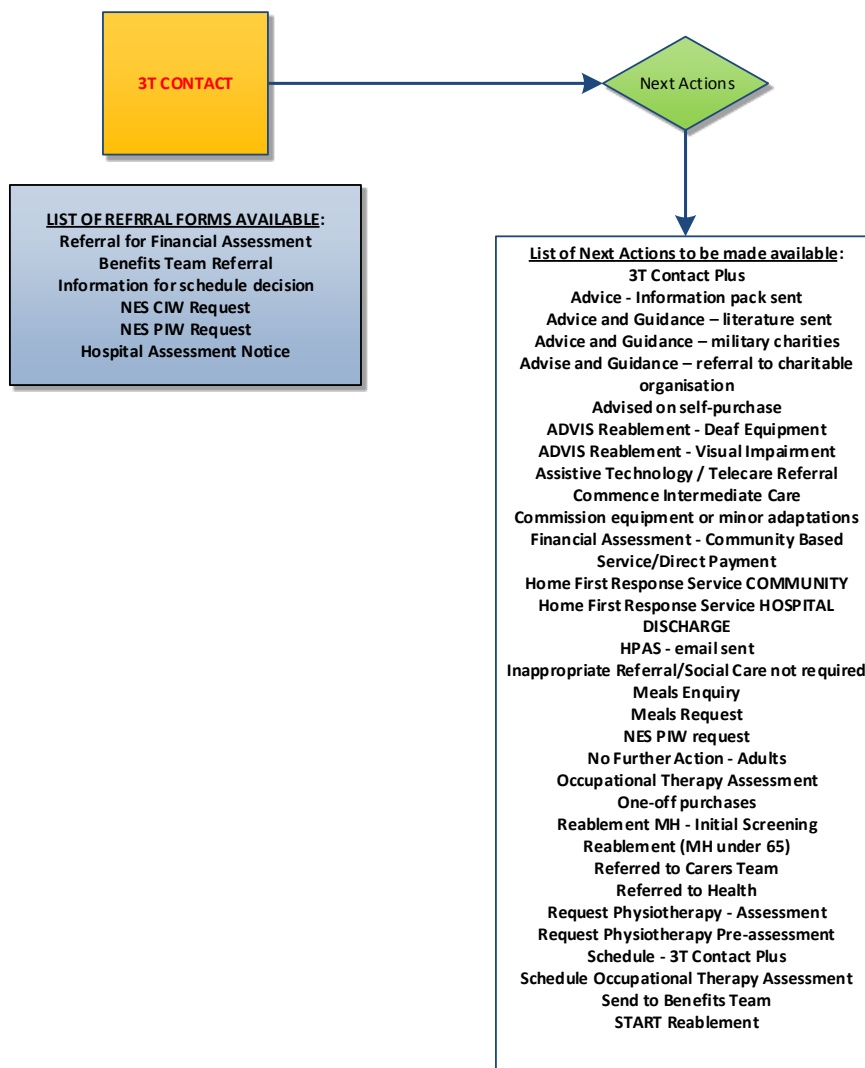

The new core workflow in Mosaic

3T Contact

The 3T Contact is the core workflow starting point for all teams outside of the CSC. It is an exact replica of the Initial Contact and if the Initial Contact has been completed prior to the 3T Contact, any information in that form will be pulled through.

There are many more next actions available from the 3T Contact than there were previously. Most of these have 'send early' capability, allowing you to add multiple next actions whilst keeping the 3T Contact open and continuing your work.

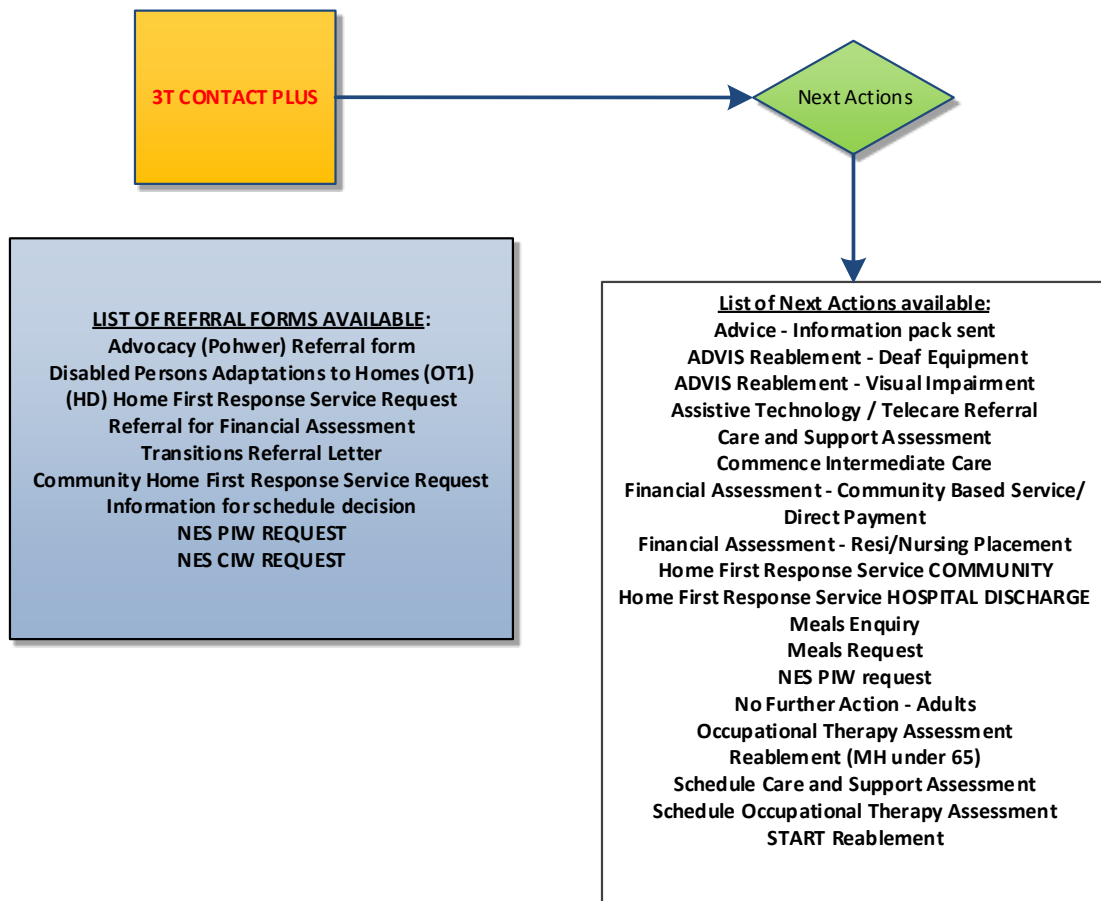

The new core workflow in Mosaic

3T Contact Plus

The 3T Contact Plus is slightly different to the Initial Contact and the 3T Contact with the addition of questions around Occupational Therapy Outcomes and method of assessment if continuing to a CASA.

Information contained within the 3T Contact will pull through into the 3T Contact Plus.

Completing a 3T Contact

- From the person summary screen, select 'Start' and open the '3T Contact'.

The screenshot shows the 'Person Summary' screen for Mr Bill Tester (100146957). The 'Start' dropdown menu is open, displaying a list of actions. The 'Warnings' section shows a 'Test' warning and a 'TEST RECORD' link. The 'Demographic Information' section includes details about the person's context, date of birth, address, telephone numbers, email, gender, marital status, first language, fluency in English, ethnicity, and religion. The 'Care Packages Provided' section shows 'Personal Budgets' and 'Reglement Services'.

3. Health Needs

Please tell us about any health issues that you have. This may include a diagnosis / details of regular medical treatment and the professional support you receive to help manage any health condition

Health conditions

Do you/the service user have an autistic spectrum disorder?

☒ Yes ☐ No ☐ Unknown

Is this diagnosis:

☐ Formal (i.e. a positive diagnosis received from a psychiatrist, clinical psychologist or multi-disciplinary team) ☐ Self-diagnosis ☐ Unknown

Do you / the service user have an associated:

☐ Learning disability ☐ Mental Health condition ☐ Neither

Do you / the service user have dementia?

☒ Yes ☐ No ☐ Unknown

Is this diagnosis:

☐ Formal ☐ Self-diagnosis ☐ Unknown

☐ Section completed

List any health/medical conditions in the health needs box

Selecting 'Yes' will reveal the next questions

* indicates required field

- The questions on autism and dementia are new and have been included for national reporting purposes. They are mandatory but if the service user/referrer does not know if they have either of these conditions, you can choose unknown.

Completing a 3T Contact

Tier 1 and 2 discussion

- This is a completely new section where you will record your conversations in relation to the referral. These might be with the referrer, the service user, or other professionals/organisations involved with the service user.
- In the 'Record of conversation' box you will need to put the date, time and name of the person you are talking to, along with details of the conversation. This is likely to include what the difficulties are, what is important to the service user, what they are able to do for themselves, what support they already have, what support they may need, any advice, information and services you have discussed, etc.
- You can add a new box for each conversation by using the 'Insert Section' button
- The 'summary and rationale' box is for you to add what action has been taken, who it has been discussed/agreed with (this may include your Manager) and why that action was the most appropriate.

Sharing your information

- Under GDPR we are required to request consent to share a person's details when we intend to share their information with any external person or organisation.
- We do not need to record their consent when we are referring them to our internal services or to those services which Nottinghamshire County Council commission.

6. Finances

indicates completed section

5. Sharing your information

Nottinghamshire County Council Adult Social Care and Health department is committed to protecting your privacy and ensuring all personal information is kept confidential and safe - for more details see www.nottinghamshire.gov.uk/privacy

If you are sharing a service user's details with an external service (which NCC do not commission) and asking them to contact the service user, you must have the person's consent to do this.

Consent required?

☒ Yes ☐ No

Consent provided?

☒ Yes ☐ No

☐ Section completed

- If you are unsure of whether you need to ask a person for their consent, the following case study may be useful:

Scenario:

Mrs A has been in hospital following a fall in her home. She is referred to the reablement team for support to enable her to return home. Once at home she receives Home Care. Following a period during which she receives support she is well enough to be more independent but her contact details are shared with a local befriending group as she has previously indicated she is lonely.

Legal basis for processing data:

Health or Social Care for the Council to provide direct care (reablement support and home care) to Mrs A

Consent – to share Mrs A's data with the local befriending service when she is exiting the NCC direct care service

Rationale:

Health and Social Care needs are classed as a special category of personal data & processing Mrs A's data is an essential part of providing that care.

However, when Mrs A becomes well enough to exit the NCC service, any onward referrals to voluntary organisations would need to be with Mrs A's explicit consent before her data is shared and the consent would need to be managed in line with NCC's Consent Procedure.

Completing a 3T Contact

Finances

- The question mark icon below will give you guidance on how to advise the person about their financial contribution. It is important that people are made aware that they may have to pay for, or contribute to, the cost of support services provided as early on in the process as possible.

Completing a 3T Contact Plus

- The 3T Contact Plus contains the same fields as the 3T Contact, although please be aware that these are not all in exactly the same order. For example, the question around participation is contained within the additional 'Method of Assessment' section.

The screenshot shows the '3T Contact Plus' form for user 'Bill Tester (100146957)'. The left sidebar lists sections 1 through 7, with '7. Method of Assessment' selected. The main form area for Section 7 contains the following fields:

- Method of assessment to be offered:** A required field with three radio button options: 'No assessment', 'Supported self-assessment', and 'Telephone'.
- Is the person able to participate in the process?:** A required field with two radio button options: 'Yes' and 'No'.

At the bottom left of the form area, there is a checkbox labeled 'Section completed'.

- There is also the addition of the Occupational Therapy Outcomes tick boxes in the 'Tier 1 and 2 discussion' section

The screenshot shows the '3T Contact Plus' form for user 'Bill Tester (100146957)'. The left sidebar lists sections 1 through 7, with '4. Tier 1 and 2 discussion' selected. The main form area for Section 4 contains the following fields:

- Tier 1 and 2 discussion - 1:** A required field containing a 'Record of Conversation' text area and a 'Summary and rationale' text area. An 'Insert Section' button is located between these two text areas.
- Has this been resolved at a Tier 1?:** A required field with two radio button options: 'Yes' and 'No'.
- Tier 2 Short Term Services - 1:** A section containing several text fields: 'Short term purchased service/one-off purchase', 'Start date', 'End date', 'Total cost (£)', and 'How will this be followed up?'. An 'Insert Section' button is located below these fields.
- Occupational Therapy Outcomes:** A section containing four checkboxes: 'Not eligible for service, advice and information given', 'Assess for major adaptations', 'Assess for moving and handling', and 'Assess for equipment/minor adaptations via ICES/Red Cross'. Below these checkboxes is a 'Summary of Information' text area. An orange arrow points to this section from the text below.

Useful Information

The new workflow will become live in Mosaic at 8am on Tuesday 2nd October 2018. All new pieces of work will need to follow the new 3 Tier workflow as of this date. The original workflow will remain available to enable workers to continue any work started prior to the 2nd October and to avoid any work being lost.

The 3T Contact and 3T Contact Plus

- The Adult Access Team can expect to receive the 3T Contact from the Customer Service Centre.
- District workers can expect to receive the 3T Contact Plus where referrals come in from the Adult Access Service. This has been designed to enable workers to further consider how the person's needs can be met through tier 1 and 2 services, and only complete the Care and Support Assessment if it is clear that a long term service is required.
- It is advisable to try to record all information within the 3T Contact forms and not to duplicate this in case notes. It is useful, however, to do a short case summary within case notes if you are ending your involvement with the person and to title this 'Case Summary'.
- The 3T Contact Plus will not pull information through in to the Care and Support Assessment. Information traditionally pulled through from the person summary screen will be there as it is now.
- The 3T Contact Plus can be scheduled to a district team or worker and is now available in Total Mobile.

Useful Information

Next Actions

- Additional next actions have been added to both the 3T Contact and the 3T Contact Plus. This allows more work to be done within the 3T Contact and avoid a 3T Contact Plus having to be completed if the need can be resolved.
- Some of the next actions are for reporting purposes only and are not sent on, whereas some will require further action. You will need to use these next steps to record what action you have taken (see screenshot below).

Useful Information

Send Early

- 3 tier conversations can take place over a period of a number of weeks whilst tier 1 and 2 services are researched, put in place and reviewed. You will be able to send some next actions early whilst keeping the 3T Contact or 3T Contact Plus open to continue your work. For example, you may choose a next action of 'Meals Request' and tick the 'Send Immediately' box. This will send your request to the Meals Service but allow you to go back in to the 3T Contact form to add further information and perhaps identify further support.

The screenshot shows a web browser window with the URL `mos-app-dev2.nottscg.gov.uk/dev-ict1/controller/workflow/startstepeditor?personidLegacy=100146957&stepDefinitionId=2115&restrictCopyForwardId=`. The page title is "3T Contact - Bill Tester (100146957)". The main form has a "Next actions form" tab selected. A modal window titled "Next actions" is open, showing a dropdown menu for "Next action" with "Meals Request" selected. Below this is a checkbox labeled "Send Immediately?" which is checked. There is a "Pass to team" dropdown menu with "Please Select --" selected, and a "Note" text area. At the bottom of the modal is a "Priority" section with three radio buttons: "Urgent" (selected), "Normal", and "Low". The background form shows "Subject Details" with "Find Subject" and "Find" buttons, and "First Names" as "Bill" and "Last Names" as "Tester". There is a "Next action" section with a "Section completed" checkbox.

- You will not be able to send the following steps early:
 - 3T Contact Plus
 - Schedule 3T Contact Plus
 - Home First Response Service (Community)
 - Home First Response Service (Hospital Discharge)

Home First Response Service

- You have received guidance and training on how to refer to the Home First Response Service. Please continue to follow this guidance and close the 3T Contact following a referral to this service. If referrals to other services are required, these must be completed before the HFRS referral is sent.

What resources do I have to find community services?

Here are just a few ideas of where you can find information about community services:

- Notts Help Yourself
- Local Community and Voluntary Service (CVS)
- Nottinghamshire Carer's Hub
- Notts Enabling Service
- Connect

For more Information or Support
