
Shared Lives

So what is the Shared Lives Service?

The Shared Lives service is housing with care support, provided by individuals, couples and families who have been approved and trained for that role.

Who can benefit from Shared Lives?

Shared lives support enables a wide range of people who need support to live independent lives and have their health and wellbeing promoted, including:

- adults with learning disabilities
- adults with autism
- adults who have mental health needs
- people with physical disability
- people with sensory impairments
- older people
- young adults transitioning from Children's services.

Shared lives placements can be:

- short term
- long term
- short breaks
- day support

What support does Shared Lives offer?

Shared lives support can be delivered in several different ways:

- living in a carer's home: the person needing support may live in the carers own home and be supported in their everyday life. Sharing a carer's home can be to cover a short-term need (such as providing a break for a person's main carer) or a longer-term situation
- day-time support: regular support sessions held in the carer's home
- outreach support: the person needing support lived in their own home, a carer provide help as needed.

How to make a referral to the Shared Lives Scheme

As part of the development of the Shared Lives Service and the streamlining of the referral process, the team are now operating a duty system for incoming referrals and queries.

There is a pathway on mosaic for all referrals into shared lives. If you wish to discuss a potential referral, you can phone the team on 0115 9772110.
