
Simplifying Processes and Service Placement Team Support

Guidance to Support the Changes being made to Mosaic on 28th November 2022

- A [recording](#) of a briefing session covering all 6 changes.
- [Case History](#) - “You said” that it’s not always easy to get a snapshot of all the conversations we have had with a person. “We have” deployed a new tab on the Person Summary screen which allows you to see which steps, case notes and address changes have happened to the person. It is a continuous log of activity that provides quick access to and navigation of the evolution of the case, and you can click on links in the summary to see the steps and case notes.
- [Dual Screens](#) - “You said” that when you need to refer to previous forms and notes in Mosaic that it can be time consuming and confusing to move between screens. “We have” made a change in Mosaic which will allow you to have two Step windows open at the same time. One will be editable, and the other read only, so you can refer to an old step to get details from it. The read only one is marked ‘Read Only’ (see example below, highlighted in red) and won’t let you enter any details.
- [Adding](#) and [Receiving](#) an Update Message - “You said” that some specialist teams need a bespoke solution to passing on information to involved workers and community teams. “We have” introduced a new step that will be used by the Countywide Approved Mental Health Professionals (AMHP) Team, Direct Payment Team, Multi Agency Safeguarding Hub and the Technology Enabled Care Team to notify involved workers or teams about information they have received and need to pass on. The step can be sent to either a worker or a team and will appear in the relevant Inbox as a step called Update Message Notification. A ‘no further action’ (NFA) on this step is all that is needed once the update information has been read.
- [Guidance on how to complete a Day Services Service Request](#) - “We have” introduced a Service Request for Day Services which will allow the Service Placement Team to start to complete the support plan costs and record the financial commitments for Day Services as they do for other service types, like residential and nursing care. This will increase the amount of support the Service Placement Team are able to provide with completing the overall support plan

costing. Once you have completed the Service Request you do not need to update the 'Costs' section of the Care & Support Plan, the Service Placement Team will do this for you.

- Occupational Therapy Work – “You said” that the current Conversations Records don’t allow Occupational Therapy colleagues to record their activity separately. “We have” introduced a new area into the Conversation 1 (C1) and Conversation 2 (C2) forms specifically for workers carrying out Occupational Therapy work. This area is revealed if you answer “Yes” to the question “Do you need to consider an occupational therapy approach?”
In addition, a new step has been created called OT follow-up. This is designed to allow Occupational Therapists to work together with colleagues in C1 and C2 but then send themselves, or a workbasket, a step to follow up on the work. The OT follow up step will also be available from Conversation 3 and the Review Conversation.
- Additional Review Question - “You said” you sometimes forget to set a future review date. “We have added a new question at the end of the Team Information section in the “Conversation 3 – Building a better life” and the ‘Review Conversation - Keeping in Touch’ forms. This asks “Is there a need to review in the future? If you say “Yes”, Mosaic will make the Next Action “Review conversation” mandatory. This way we can ensure all workers have a review in place when one is required.

Three Conversations

On 4th April, Three Conversations became our way of working with people across the department and was reflected by changes to the core workflow in Mosaic and the Service Placement Team starting to cost and source some service types on behalf of social care practitioners. This is on a phased basis, starting with **home-based care** and **residential and nursing care**.
