
Supported living

Supported living
Nottinghamshire County Council

Watch on

This short film aims to give a clear, easy to understand introduction to supported living for people with Care Act eligible needs, their families and the professionals supporting them as they explore housing options.

Supported living means having your own home, with the right level of support, so you can live as independently as possible while still getting help when you need it. It shows how supported living can offer independence and security.

The film uses clear explanations and real-life stories to show the different types of homes people can live in. For example, individual flats or shared houses and the flexible, personalised support available. As well as how professionals help people build skills and confidence.

It also explains that supported living is an alternative to residential care, giving people choice and control over where and how they live, highlighting key areas such as tenancy agreements, housing rights and maximising benefits.

Support available under the Multi Provider CSE Framework 2025 - 2029 (With effect from 4

September 2025)

This service is available to people aged 18+ who have a learning disability, physical disability or mental health issues and or complex needs who wish to live as independently as possible. Supported living supports people to choose where they want to live and what support they receive. Nottinghamshire County Council commissions a range of care, support and enablement options from various CSE providers to suit different levels of needs. The [Housing with Support \[pdf\]](#) sets out how the Council will work together with partners to provide these services. This strategy document will be updated so that it ties in with the new [New Countywide Housing Strategy \[pdf\]](#) that has been approved for 2024 – 29.

Care Support and Enablement Services (CSE) – available under the Multi Provider CSE framework (2025 - 2029)

People told us what was important to them as part of the recommissioning of the Care, Support, and Enablement (Supported Living and Community Networks) contract. Key themes include:

- “I feel that people around me value me for who I am and the things I can do”
- “I can do things that are important to me, as independently as possible”
- “I am fully involved in and given choice about my support and make my own decisions”
- “I can have choice about where I want to live”

To deliver this vision the Council has re-established a Multi Provider Care, Support and Enablement (CSE) Framework Agreement that places the above principles at the heart of the care and support offered to the people under this Agreement. The Framework intends to deliver on key areas which include:

- Strengths-based – We want individuals to be supported to build on their strengths to achieve great outcomes which meaningfully impact their lives.
- Outcome focused – We want individuals to be supported in a person-centred and outcome focused way, promoting independence, improving wellbeing and quality of life, and reducing feelings of loneliness and isolation.
- Innovation – We want providers to be supported in pursuing innovative new ideas and approaches, working to achieve great things with people.
- Support to move on – We want people to be supported to progress their independence, living in a place they can truly call home.

Who provides the Care, Support and Enablement under the 4 September 2025 agreement?

The new Multi Provider CSE Agreement commenced on 4th September 2025. There are 68 providers registered with the Council under this contract, however please note the list is subject to change. Read the [contract register list of CSE providers on the 4 September 2025 provider framework](#).

What type of assistance can be provided by a CSE provider under the new CSE framework?

Lot 1 – Supported living

Can include support:

delivered in supported living accommodation, which can include daytime, shared, and night-time support. (This is now called Supported Living WITH Accommodation).

that can be delivered in the community or in the persons own home, which promotes maximising independence (formally known as Outreach support, now called Supported Living WITHOUT Accommodation).

to help a person attend a regulated day activity (formerly known as CSE Day Care 1:1 support, now called Supported Living WITHOUT Accommodation).

Lot 2 – Enhanced supported living (plus)

Can include:

- Specialist support for people who may have complex support needs. Typically this support may be delivered in highly bespoke environments and designed accommodation, delivered by experienced and qualified staff who receive specialist training, onsite management and regular supervision. (This is now called Enhanced Supported Living Plus WITH Accommodation).
- This can also include support delivered in the community, in the persons own home or to help them attend a regulated day service – where the person has very complex needs (This is now called Enhanced Supported Living Plus WITHOUT Accommodation).

Lot 3 – Accommodation and support

Enables the Council to arrange contracts with external care providers to create bespoke accommodation and support arrangements. This process is managed by the

strategic commissioning team.

Lot 4 – Community Networks

Community Networks – mostly likely to be in the form of Community Hubs – defined as delivery of outcome-focused group support during waking hours, aiming to strengthen community connections, enhance confidence and skills, and reduce social isolation. Most of this support is expected to occur within the community, supporting groups of two or more people simultaneously. This process is managed by the strategic commissioning team.

What is the process to commission support services from the CSE framework?

Please read the [guidance](#) to decide which process to follow. The latest [CSE Specification Form](#) must be completed and sent to cse-brokerage@nottsc.gov.uk.

Individuals accessing accommodation based supported living must have pathway approval via accommodation panel. Where a person requires a bespoke and specialist single person service, a specification should be sent to csesupport@nottsc.gov.uk.

Any further queries/comments about the CSE framework can also be sent to csesupport@nottsc.gov.uk who will be developing a spreadsheet of frequently asked question that workers will be able to consult by following this link – [Multi provider CSE Framework Sept 2025 – FAQ](#).
