
PAR - Package Amendment Record

What has changed?

Since the Integrated Care Board (ICB) introduced their Change of Package (CoP) form last year, they have not been signing ACM33 forms within Mosaic. This has resulted in an increase in finance queries and delays in ICB recharges being paid.

As a result, the ACM33 form within Mosaic was withdrawn on 28 April 2026.

What is the new process?

From 28 April 2026, package amendments must be completed using the ICB's Change of Package (CoP) form, which has been renamed—by agreement with the ICB—to the PAR form (Package Amendment form).

While there were some initial challenges in implementation, using a single shared form with the ICB is the most practical approach.

Accurate completion of the PAR form, timely sign off and clear recording in Mosaic are essential to ensure prompt ICB invoicing and income recovery.

Step by step guide for operational teams

Step 1 – complete the PAR form

Complete the paper PAR form in full, ensuring all Care and Support plan details are accurate.

Step 2 – calculate costs

Use the calculator tool if needed, as the paper form does not calculate costs automatically.

Step 3 – head of service sign off

Send the form to the relevant head of service for approval and mark the email as high importance.

Step 4 – ICB sign off

Once signed by the Head of Service, send the form to the ICB for their signature.

Step 5 – submit the final form

After both signatures are obtained:

- save the form as a PDF
- email it to: ncc.financechc@nottsccl.gov.uk

Step 6 – record keeping

Ensure the Care and Support plan, funding split and start/end dates for the package change are:

- clearly recorded on the PAR form, and
- updated within Mosaic.

Completing the PAR form

We have created a short guidance video to support staff with the introduction of the PAR form and have included as much key information as possible while keeping the video concise and easy to follow:

- [PAR form briefing and guidance.mp4](#)

Take a look at an example of what a PAR form looks like when completed accurately:

- [Completed PAR form \[Word\]](#)

It is essential that all staff watch this video. If the guidance is not followed, there is a significant risk that PAR forms may be completed incorrectly, which will lead to unnecessary delays.

Using the calculator

This calculator incorporates as many features as possible within the time constraints, but it's crucial that anyone using it carefully checks the calculations and applies their professional judgement when setting the rates. Please be aware that this tool is only

a temporary solution while we work on integrating the PAR form into Mosaic, which will eventually replace the ACM33.

Should any issues arise with the calculations, please reach out to Natalie Foster and Claire Rickett directly. They will do their utmost to support you, but they want to emphasise that it remains the social workers' responsibility to fully understand the financial aspects of care packages.
