MOSAIC USER GUIDES : Pending – Future Contact Needed

A Contact/Contact Plus to any form of Assessment or appropriate Next Action is received into the Future Work and then the Incoming folders of the worker or team and automatically sets off any appropriate timescales, based on priorities.

The current timescales run from the start of the Contact to the end of Assessment which is currently a 28 day period. In some cases a planned visit for proposed assessment or further information is delayed and will go out of any agreed performance indicator timescales – **at this point the Pending – Future Contact Needed Next Action is to be used** and can be chosen from the Next Actions list of either the Contact or Contact Plus so that further appropriate information can be gathered prior to Assessment Next Action being set or progressing and re-activating the timescales.

The workflow map show the possibilities of all Next Actions, the Pending – Future Contact Needed can be set either at Contact or Contact Plus stage.

From the Contact or Contact Plus 'Actions Taken' options, when choosing the Pending – future contact needed, the PI timescales will stop and will only restart from the scheduled date or when the next step is started/created.

When setting the Pending – future contact needed Next action, the Scheduled Date has a two week default, however, this is editable if necessary.

One week prior to the default or manually set future date which you set within your Pending episode, the next/subsequent episode to this, the Further Contact Needed, will automatically drop into your or the team's Incoming work folder (depending on whether it was assigned directly to you or to the team). You can then access this piece of work either through your Incoming Work list in Workview or directly from the 'Start' option on the Service User Current Work list.

Either choose the piece of work from your Incoming Work when ready to progress

Or click to 'Start' from the Service User's front screen Current Work list

At each Step, when a form is required i.e. another Contact form or Contact Plus, any further forms in the workflow, for example an Assessment, will pull through information from any relevant sections of the last/most up to date version, if appropriate. Please note however, that referrer information may not and may need to be manually entered again.
