

HBC AMENDMENTS — CHECKS BEFORE SENDING TO SPT

CHECK LIST

- **Portal:** The worker is required to submit the amendment form for Home Based Care, designated for LP/AP, via the online portal. This submission must be approved and completed prior to being forwarded to SPT for commissioning.
- **Hours:** The total number of weekly hours at present must match with what is presently commissioned. Any amendments should reflect the new total weekly hours. Please note that hours should be represented in decimal format, for instance, 3.5 signifies 3 hours and 30 minutes, and 3.75 denotes 3 hours and 45 minutes.
- **Documents:** Please ensure that both the Care & Support Plan and the Home Based Care amendment form are attached during the commissioning phase and that they correspond with each other.
- **Decreases:** For reductions that are applied retrospectively over a month, approval is required from CountyWide.EMS@nottsc.gov.uk
- **Supplementary/DPS/SPOT providers:** It's not necessary for these to undergo the portal process. Therefore, make sure the provider's email, which confirms the change, is uploaded or case noted.
- **Short term/Long term radial button:** Short-term is strictly for a duration of 6 weeks or less. Any changes that extend beyond 6 weeks are considered long-term.
- **Support Plan:** Update the current support plan by removing the cost and inputting the end date. Then, on a new line, indicate the date of the change along with the updated total weekly hours and weekly cost.
- **Further amendments:** These actions must be performed in a sequential manner, one after the other, and can only be submitted once the previous amendment has been both requested and commissioned.
