

MOSAIC GUIDANCE

How to search for a person

For further assistance with using Mosaic, please contact your local Business Systems Support Officer (BSSO) or contact the Framework Development Team (Adults)

Centre 03, County Hall, Loughborough Road, Nottingham, NG2 7QP

The objectives of these best practice guidelines are:

- to learn how to search the system for people using a range of different search methods,
- to learn what the rules are for searching for people in the system,
- to learn the importance of searching the system thoroughly prior to adding a person and
- to understand the potential consequences of not searching correctly or thoroughly.

There are a few ways to find a person:

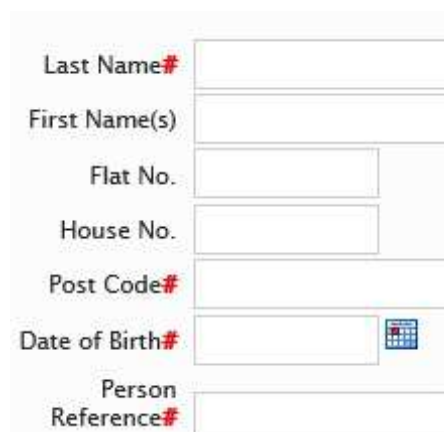

- From the **QUICK START** menu in **FULL** workview, click the **FIND PERSON** button.

- In **NARROW** or **CLOSED** workview, select **FIND PERSON** from the **PEOPLE** menu

- In the **FIND PERSON** screen, you can enter the search criteria by which you want to find a person. You can search by one field or a combination of fields but at least one field marked with a # is required.

A screenshot of a search criteria form. The form has a light gray background and contains several input fields. The fields are labeled: "Last Name#", "First Name(s)", "Flat No.", "House No.", "Post Code#", "Date of Birth#", and "Person Reference#". The "#" symbol indicates a required field. The "Date of Birth#" field has a small calendar icon to its right. The "Person Reference#" field is at the bottom of the form.

There are some recommended techniques for searching but the rule of thumb is
LESS IS OFTEN BEST!

Even though you can add a person after undertaking your initial search, there is a real danger that without conducting several different searches or searching the system thoroughly, you could potentially create a duplicate record.

If you create a duplicate record it may result in important case information for the same person being recorded on two or more separate records. Therefore, if you only undertake one search and conclude that the person is not on the system, you must assume that the original search criteria were not suitable and therefore conduct several further searches using the recommended search techniques below before creating a new person.

Recommended search techniques

- Search with the last name only
 - Search with the first 3 letters of the last name
 - Search with the postcode only
 - Search with the date of birth only (if known)
 - Search with the street name
 - Search with the last name and date of birth
 - Search with the last name and the first 2 or 3 letters of the first name
-

Using a wildcard (% Symbol)

The percentage symbol % can be used to replace characters. For example, if you need to find a person with the first name Kathleen but are unsure as to whether it is spelt Kathleen, Kathy or Cathy, you could try searching %ath in the first name field and enter their last name (which in this example is Harrington). This search would find Kathleen Harrington and Matthew Harrington.

Dynamic Filter

If the search results are too long, you can filter the list by using the dynamic filter (which works in a similar way to searching within search results). The dynamic filter (the search field in the image below) looks at all the characters in the name, address and date of birth fields. For example, if you enter 1995 in the dynamic filter (search field below) only Dawn Meed would be listed as her year of birth is 1995.

Searched for: Last Name: meed

Show	15	entries	Search:	
ID	Name	Address	Date of Birth	
5038853	Dawn Meed	7 Fourth Avenue Rainworth NG21 0BZ	01/01/1995 (est.)	
5038853	Dawn Meed	Not Known Not Known NK99 9ZZ	01/01/1995 (est.)	
100124935	Mr Cyril Meeds	19 Oldershaw Road East Leake LOUGHBOROUGH LE12 6NF	04/06/1925
