

Care charges calculator

Estimate how much you may need to pay for care and support at home by entering your income and savings.

This calculator gives an estimate only. Your actual care charges are confirmed after a care and support assessment and a financial assessment.

If you are thinking about moving into a care home, read [Paying for a care home](#).

How much you may pay

Most people pay something for their care. How much you may need to pay depends on your savings and income.

- **Over £23,250** – you usually pay the full cost (self-funder)
- **£14,250 to £23,250** – you pay based on your income and savings
- **Below £14,250** – you pay based on your income only

In some cases, you may not need to pay.

Contact [Customer Services](#) to check if this applies to you.

This service is for

People who receive care at home and want an estimate of their likely care charges.

You will need

- details of your income
- details of your savings, investments, property or land

Tips for filling in the form:

- **If you are part of a couple, add your savings together.** The calculator will split them for you.
- **If you have more than one account of the same type, add the balances together** before entering them.

Start the calculator

Alternative ways to do this

If you cannot use this online service, contact the [Customer Service Team](#) and they will help you find another way to get an estimate.
