The Portal uses the NHS number to identify the correct record. If there is no NHS number in Mosaic the Portal will not find a record.

- To access the Care Centric portal you need to be on the SU summary screen in Mosaic.
- From the SU person summary screen click the Health option and then View record on HIE.

Health Information Exchange – Consent

Consent Request

Fields marked with a * are required

You are attempting to view client information from the Health Information Exchange (HIE).

HIE data will be retrieved.

You must provide a reason for accessing the client's record:

Consent request: Please Select --

Override reason: Please Select --

Comments

OK Cancel

- From here you will be asked for Consent or an Override reason.
- Complete these and click Ok.
- For further details on the Consent questions please see the next page.

Consent to access the Portal

- To access the Nottinghamshire Health and Care portal (Carecentric), Mosaic social care staff must first answer a question about whether the service user has consented to share their information with them. The following guidance and procedures should be followed.
- In the same way you may ask before contacting their GP or other health professionals for the information, have a discussion about accessing this information on an electronic system instead.
- The legal agreements are in place to allow social care staff to access this information for direct care purposes only. As this is a new system, this discussion may relay some fears and builds trust in the reason why you need details from health records.
- All access is recorded and auditable and the consent reason for access recorded.

Key Do's and Don'ts

Do

- ✓ Explain to the Service User the purpose the information is needed for, such as to provide the most appropriate care.
- ✓ Record any discussions about the access in a case note - such as any concerns the service user has.
- ✓ Make a note of access in Mosaic where information has been gathered from the portal.
- ✓ If consent cannot be gained only access this if required for direct care e.g. knowledge of long term health condition impacts the care package commissioned.
- ✓ Make a case note about using the portal and how you used the info. This not only keeps a clear audit trail but might help other future Mosaic users dealing with them understand what info you have gathered from the portal already.

Don't

- ✗ Ignore the wishes of a service user for convenience to gain information. If they have *justifiable* reasons and there is no emergency duty of care they may request you access information an alternative way- e.g. contacting a GP formally.
- ✗ Print from the Portal – Screen shots, screen clippings or photographs of patient information in the portal are prohibited as part of the legal agreement.
- ✗ Access any records you should not be working on for direct care purposes. All access is recorded and audited.

The Following section details the various processes to access the portal to record the consent

Consent Granted by Service User

If you have spoken directly to a Service User before accessing the portal and have gained direct consent to gather their information this way, use the following instructions and reasons.

Select “Agree to Share Granted by Service User” in the Mosaic screen . The portal will then open in a new window. It may take a few seconds to load.

Health Information Exchange - Consent

Consent Request

Fields marked with a * are required

You are attempting to view client information from the Health Information Exchange (HIE).

HIE data will be retrieved.

You must provide a reason for accessing the client's record:

Consent request * -- Please Select --

Override reason -- Please Select --

Comments

Agree to Share Not Granted (Specify override reason)

Agree to Share Not Required - Duty of Care

OK Cancel

The Patient or Service User may grant access to health and care staff for just this consultation or indefinitely- use the next screens on the portal as they appear to complete the consent process.

Consent Granted- for today's Consultation

If the Service user has granted consent for a single consultation then the option "Yes – just related to today's consultation" should be selected then press the Proceed button.

This would be the most logical choice to discuss with a Service User so they understand the purpose of looking at their health information and doesn't assume any future consent for other health or care staff.

Patient Consent

TESTPATIENT, Testcommunityfifty (Professor)

Male Gender	06/06/1967 (51y) Born	999 444 9877 NHS No.	K9501804 Patient No.
----------------	--------------------------	-------------------------	-------------------------

Has the patient consented to have their record viewed?

- ☐ Yes – for all health and social care staff indefinitely
- ☒ Yes – just related to today's consultation
- ☐ No – consent denied
- ☐ Not asked – emergency/other

If you give consent you are allowing authorised Health and Social Care Professionals within Nottinghamshire who treat you to access your shared record to support the delivery of your care.

This patient has understood the disclaimer and is giving consent to access their patient record for 1 Day.

Proceed

The patient details will now be visible with the warnings and allergies screen loading first if relevant.

If the proceed button does not show and you're unable to scroll down you will need to either reduce the size your web page is zoomed into, or use the tab key on your keyboard

Go to Page 13 for "Navigating the Portal"

Consent Granted – Indefinitely

If this has been granted indefinitely by a health worker previously the following boxes may not appear and the first screen shown is a warnings and allergies screen (if applicable).

Patient Consent

TESTPATIENT, Testcommunityfifty (Professor)

NHS No.

Patient No.

Has the patient consented to have their record viewed?

☒ Yes – for all health and social care staff indefinitely

☐ Yes – just related to today's consultation

☐ No – consent denied

☐ Not asked – emergency/other

If you give consent you are allowing authorised Health and Social Care Professionals within Nottinghamshire who treat you to access your shared record to support the delivery of your care.

This patient has understood the disclaimer and is giving consent to access their patient record Until Further Notice.

Proceed

Only select this option if you have had a discussion with the Service User and confident they are happy to consent for all future health and care professionals to have indefinite access to the health and care (CareCentric) portal. Always make a case note on this decision and the discussion that took place.

If you are unsure in any way on their preference only click “for today’s consultation only”.

Go to Page 13 for “Navigating the Portal”

Consent to share not asked/ required –Duty of Care

If you require Health information in order to make informed decisions on a service user's direct care, you do not require their consent to be able to view this as there is a duty of care involved.

If you are obtaining this information from a Health organisation prior to having access to this portal, and are not getting their consent then continue to follow those processes.

Select **Agree to Share Not Required – Duty of Care** option and click OK. The portal will then open.

Health Information Exchange – Consent

Consent Request

Fields marked with a * are required

You are attempting to view client information from the Health Information Exchange (HIE).

HIE data will be retrieved.

You must provide a reason for accessing the client's record:

Consent request * -- Please Select --

Override reason -- Please Select --

Comments Agree to Share Granted by Service User
Agree to Share Not Granted (Specify override reason)

OK Cancel

When the consent question follows in the portal the following answer needs to be chosen.

“Not asked – break glass”

Select “Other” Consent and specify “Other” and in the comment box and detail the the duty of care reasons you have accessed the portal.

Patient Consent

TESTPATIENT, Communityliverest (Mr)

Male Gender 03/10/1959 (59y) Born NHS No. K3242586 Patient No.

Has the patient consented to have their record viewed?

- ☐ Yes – for all health and social care staff indefinitely
- ☐ Yes – just related to today's consultation
- ☐ No – consent denied
- ☒ Not asked – break glass

Have you got any other consent? ☒ Other ☐ Emergency

Beware your actions will be logged and you may be asked to justify them.

Please specify why you don't need explicit consent 0/500

Other

Proceed

If no consent question follows the indefinite consent may have been selected previously.

As all access to the portal is then also audited at NUH this reason should be also completed in a Case Note in Mosaic about using the portal.

If the proceed button does not show and you're unable to scroll down you will need to either reduce the size your web page is zoomed into, or use the tab key on your keyboard

Go to Page 13 for “Navigating the Portal”

Consent not Granted – Duty of Care / Break Glass reason

If a Service User has denied consent to access to the portal but there is a duty of care need to access this information and a *justifiable* reason to access this, follow these guidelines.

There should only be 2 reasons where access to the portal is accessed where the Service User has not agreed but the social care worker needs to override this:

- Safeguarding or Best Interests concerns
- Consent granted by person with authority e.g. Parent/guardian, Power of Attorney.

Health Information Exchange - Consent

Consent Request

Fields marked with a * are required

You are attempting to view client information from the Health Information Exchange (HIE).

HIE data will be retrieved.

You must provide a reason for accessing the client's record:

Consent request * Agree to Share Granted by Service User

Override reason -- Please Select --

Comments Agree to Share Granted by Service User

Agree to Share Not Granted (Specify override reason)

Agree to Share Not Required - Duty of Care

OK Cancel

When the consent question follows in the portal the following answer that needs to be completed.

Although this has been asked still select **“Not asked – break glass”**

“Other” Consent and specify “Emergency” and in the comment box and detail the the duty of care reasons you have accessed the portal. For either the safeguarding reasons or the details of the consent from the person of authority.

Patient Consent

TESTPATIENT, Communitylivetest (Mr)

Male Gender 03/10/1959 (59y) Born NHS No. K3242586 Patient No.

Has the patient consented to have their record viewed?

- ☐ Yes – for all health and social care staff indefinitely
- ☐ Yes – just related to today's consultation
- ☐ No – consent denied
- ☒ Not asked – break glass

Have you got any other consent? ☒ Other ☐ Emergency

Beware your actions will be logged and you may be asked to justify them.

Please specify why you don't need explicit consent 0/500

Other

Proceed

If no consent question follows the indefinite consent may have been selected previously.

As all access to the portal is then also audited at NUH this reason should be also completed in a Case Note in Mosaic about using the portal.

Go to Page 13 for “Navigating the Portal”

No Consent to share by Service User

If a discussion has taken place and the Service User has a justifiable reason to not allow consent for a particular social care worker to access the portal (such as a known family member) then the social care worker should not enter the health menu to access the portal.

A case note should be written that this discussion took place and the case management discussed with their manager. If a Service User wants to revoke all access of their information in the health and care portal they will need to Contact Nottingham University Hospitals Trust who are the hosts of the system, emailing NHCP@nuh.nhs.uk or calling 0115 970 9946.

The screenshot shows a 'Patient Consent' window. At the top, it identifies the patient as 'TESTPATIENT, Testcommunityfifty (Professor)'. Below this, a table lists patient details: Male (Gender), 08/06/1967 (51y) (Born), 999 444 9877 (NHS No.), and K9501804 (Patient No.). The main section asks 'Has the patient consented to have their record viewed?' with four radio button options: 'Yes – for all health and social care staff indefinitely', 'Yes – just related to today's consultation', 'No – consent denied' (which is selected), and 'Not asked – emergency/other'. A disclaimer box below states: 'If you give consent you are allowing authorised Health and Social Care Professionals within Nottinghamshire who treat you to access your shared record to support the delivery of your care.' At the bottom, a status bar says 'This patient has understood the disclaimer and is giving consent to access their patient record for 1 Day.' and a 'Proceed' button is visible.

If you have gained consent to access the data over the phone with an individual and after you have entered the health menu they change their mind you should select “No consent denied” on the Health and Portal screen.

Close the portal window and update any relevant case notes. Explain to the Service User the information you will need to formally request from themselves or relevant health organisations to provide the most appropriate care for them.

Navigating the Portal

- Which ever page in the portal you are on, you should be able to see the above tiles.
- You can use the large blue icons to navigate the portal and move around the major areas of the portal.
 - MIG Summary – GP Information
 - Activity – Hospital Information from NUH and Sherwood Forest Trusts
 - Clin. Letters – Copies of letters sent from hospital to a patient
 - Mental Health – Mental Health Info from Notts Healthcare Trust
- You can also use the smaller icons to navigate:
 - Go back a page
 - Go to the home page
 - View documents
