
The Service Placement Team

Who are the Service Placement Team?

The Service Placement Team (SPT) sit within the Chief Executive Business Support Structure. The Team is managed by a Business Support Officer and consist of 2 Senior Business Support Administrators and 17 Business Support Administrators. The team are a hybrid team working countywide. They have bases in the following locations across the county.

- Lawn View House
- Sherwood Energy Village
- Sir John Robinson Way

What do the Service Placement Team do?

The Service Placement Team undertake all Mosaic commissioning activity using information recorded in the support plan in the sections of the Support Plan that cover **Costs of Support (section 7)** on behalf of social care practitioners and support the home-based care portal processes sourcing providers and costing of home-based case care.

The Service Placement Team will:

- Check all necessary documents have been completed correctly
- Check the correct workflow step has been used
- Check that the correct provider details have been added
- Check costs match the support plan

- Check the start and end dates have been submitted as required
- Commission all packages of care
- Input details into the Mosaic commissioning screens
- Ensure all packages of care are approved by Budget Holders
- Ensure all budgets balance.

Service Level Agreement:

The team have a service level agreement agreed with the Adult Social Care & Health Senior Leadership Team. All steps will be commissioned (and authorised) within 7 days of receipt.

To ensure all steps are commissioned within 7-day SLA, SPT commission steps in date order and are instructed not to prioritise steps, even if they are red flagged.

- Returning steps to workers is a time-consuming process and significantly impacts on SPT's ability to commission within this timeframe.

All requests to SPT must have either:

- Care & Support Plan (All new care packages)
- Review of Care & Support Plan (amend or end care package)
- Care & Support Plan Update (short term/temporary/one-offs/uplifts/DPSS ONLY)
- For Carers payments Carer ***under 18*** (*Conversation - Under 18' OR 'Review of Carer Conversation - Under 18'* document)
- For Carers payments **adult's caring for adults** (Conversation with carer or Review Carer Conversation).

Note: Support plans are locked when sending steps to SPT and only available to SPT as READ ONLY therefore, SPT cannot make ANY changes to them.

How do SPT (Service Placement Team) help with the Home-Based Care Portal?

Practitioners are required to send a Request for Services to the Service Placement Team via Mosaic. SPT will then manage all new Home-Based Care requests and changes to providers through the Home-Based Care Portal. [Take a look at the Practitioner HBC Check list \[pdf\]](#). It lets you know what checks you need to complete before sending to SPT to commission.

The Service Placement Team will:

- Trigger the Home-Based Care request step
- Carry out the portal function to identify a provider
- If no provider is available via the portal, then the Service Placement team will make a request via Quality Market Management Team (QMMT).

Once a provider is identified the Service Placement Worker will:

- Complete the portal process
- Update the 'Ongoing Payment' table in the 'Costs' section of the Care & Support Plan with the details of the Home-Based Care service
- Complete the original request you sent to let you know the work has been processed
- Send an email confirming a Home-Based Care has been found
- Add a case note confirming Home-Based Care has been found.

Please note SPT undertake HBC amendment Portal requests. HBC amendment forms are submitted to the portal by the worker. Take a look at the '[HBC Amendments, checks before sending to SPT](#)'[pdf] checklist.

Should you need to withdraw a HBC request SPT have put together this [handy checklist \[pdf\]](#) to help.

Contacting the Team

You can contact SPT the following ways:
